Title: FERC-516A, Standardization of Small Generator Interconnection Agreements and Procedures.

OMB Control No.: 1902-0203.

Type of Request: Three-year extension of the FERC-516A information collection requirements with no changes to the current reporting requirements.¹

Abstract: Sections 205 and 206 of the Federal Power Act (FPA) (16 U.S.C. 824d and 824e) require the Commission to ensure just and reasonable electric

¹ At present, an information collection request involving FERC-516 and FERC-516A is pending in connection with the proposed rule in FERC Docket No. RM22-14-000. This request for renewal does not include the pending request regarding the proposed rule, and our intention is to prevent any conflict between this request for renewal and OMB's consideration of FERC-516A in connection with the proposed rule.

transmission rates and charges, and ensure that jurisdictional providers do not subject any person to any undue prejudice or disadvantage.

In furtherance of fulfilling these Commission responsibilities, the regulation at 18 CFR 35.28(f)(1) requires transmission providers to include the following information in their open-access transmission tariffs (OATTs):²

- Commission-approved, standard, *pro forma* interconnection procedures (i.e., small generator interconnection procedures or SGIP); and
- A single, uniformly applicable interconnection agreement (i.e., a small generator interconnection agreement or SGIA).

This information helps the Commission ensure that transmission providers consider and process interconnection requests by small generators consistently and in compliance with the FPA.

Type of Respondents: Jurisdictional transmission service providers.

*Estimate of Annual Burden:*³ The Commission estimates the annual public reporting burden for the information collection as follows:

² The regulation at 35.28(c)(1) requires an OATT “of general applicability” for every public utility that owns, controls, or operates facilities used for the transmission of electric energy in interstate commerce. The OATT must be the *pro forma* tariff promulgated by the Commission, as amended from time to time, or such other tariff as may be approved by the Commission consistent with the principles set forth in Commission rulemaking proceedings promulgating and amending the *pro forma* tariff.

³ The Commission defines burden as the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a Federal agency. For further explanation of what is included in the information collection burden, see 5 CFR 1320.3.
